## IV. DISCUSSIONS

The team met several times over the course of the last week in order to continue working on their subsystems. The team discussed the best course of action for the presentation.

## V. DECISIONS

The team decided that the members would work on their own individual subsystems while occasionally chiming in on the other's work in case it was needed. The team decided to splinter the presentation up into several pieces. Each member would be responsible for their own subsystem's presentation and would collaborate together for the group part. They would be responsible for getting slides made and attempt a recording before the team's meeting on Monday. During this meeting on Monday, the team would get together and finish out the recordings, which would be turned into the final presentation.
